JAVA BACKEND DEVELOPER | SPRING BOOT DEVELOPER

PROFESSIONAL SUMMARY

Java backend developer and B.Tech CSE graduate with a **6-month software development internship** and hands-on experience building RESTful services with Spring Boot, Spring Security, Spring Data JPA, MySQL, MongoDB and Redis. Strong foundation in Core Java, OOP, the Stream API, multithreading, SQL and DSA, plus authentication (OAuth2, JWT, OTP-based 2FA), testing and debugging. Smart India Hackathon national winner. Seeking entry-level Java Developer / Backend Developer roles.

TECHNICAL SKILLS

Languages: Java, SQL, Python (Basic), C, C++ | **Web:** HTML, CSS, JavaScript, XML
Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security (OAuth2 / OIDC), Hibernate, REST APIs, JWT Authentication, Apache Kafka, Thymeleaf, MapStruct, Microservices (Basic)
Databases & Caching: MySQL, MongoDB, Redis, JDBC, Flyway, Joins, Subqueries, Indexing, Schema Design
Core Java: OOP, Collections, Stream API, Exception Handling, Multithreading & Concurrency, File Handling, DSA
Tools & Practices: Maven, Gradle, Git, GitHub, Docker, Postman, IntelliJ IDEA, JUnit, Mockito, SDLC, Agile, Debugging

INTERNSHIP EXPERIENCE

GreenChip Consulting — Software Development Intern *Jul 2023 – Jan 2024*

- Developed and maintained backend modules using Core Java, JDBC and SQL within an Agile team, structuring code into layered domain, repository and service classes using OOP principles.
- Built and validated data-access logic with SQL queries (joins, subqueries) for record checks and input/output validation.
- Wrote Stream API / Collectors utilities (groupingBy, partitioningBy) to parse, filter and summarise CSV data.
- Implemented thread-safe handling of shared resources with ExecutorService, BlockingQueue and locks to prevent race conditions.
- Defined custom exception hierarchies with clear error messages and wrote JUnit tests for core service logic.
- Performed debugging and root-cause analysis on application issues; improved readability and maintainability through modular refactoring and documentation.

PROJECTS

Secure Authentication & SSO Service Spring Boot · Spring Security · OAuth2 · MySQL · Redis · Docker

- Built a Spring Security 6 auth service with BCrypt form login, OAuth2 / OIDC social sign-in (Google, GitHub, Facebook), role-based access control (USER / ADMIN) and remember-me tokens.
- Added email OTP two-factor authentication and a token-based password-reset flow, storing OTPs in Redis with expiry, attempt limits and resend cooldown.
- Cached user lookups in Redis with TTL, versioned the MySQL schema with Flyway, containerised the app with a multi-stage Docker build and Docker Compose, and unit-tested services with JUnit and Mockito.

E-Commerce Backend API Spring Boot · MySQL · Spring Security · JWT

- Designed and developed a RESTful e-commerce backend with modules for user authentication, product catalog, cart and order management.
- Implemented role-based auth with Spring Security and stateless JWT; modeled MySQL data via Spring Data JPA / Hibernate in a layered architecture with centralized exception handling.

Email Sender Service Spring Boot · Spring Mail · Thymeleaf

- Built a REST + Thymeleaf email service with separate endpoints for plain, attachment and resource-based emails, bean validation and externalized config via @ConfigurationProperties.
- Mapped a custom exception taxonomy (auth, network, oversized or unsupported attachment) to precise HTTP statuses with @RestControllerAdvice; enforced attachment size caps and a path-traversal guard.

Task Manager API Spring Boot · MongoDB · REST

- Built a layered task-management REST API with CRUD, status / priority / due-date tracking, filtering and input validation, tested in Postman.

Solar Tracking System Smart India Hackathon (National) Winner

- Co-built a solar tracking prototype to maximize energy capture; contributed the core tracking logic.

EDUCATION

B.Tech, Computer Science and Engineering — *UIET, Kurukshetra* *2020 – 2024*
Senior Secondary Education (XII) — *Aggarsain Public School, Kurukshetra* *2018 – 2020*

CERTIFICATIONS

Advanced Java Developer – Coding Ninjas | Python Training – Internshala | Android App Development – Internshala
